

# SKS WATER

SKS WATER Filtration System creates clean water solution  
Our filtration system uses the same technology used by NASA.

Purer Than Bottle Water

Save the planet by replacing bottled water with the SKS Water Filtration System.

# COMPANY PROFILE

## Our Philosophy

To improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and safe reuse globally.

## Our Mission

To support Clean Water in Local & International Level  
Support SDG Goal 6

## Our Vision

To protect our environment, health, economic well-being and community quality of life.

## Our Goals

To achieve universal and equitable access to safe a water for all.

# PFAS

Per- and polyfluoroalkyl substances are a group of nearly 5,000 compounds with bonds so tight that they are almost indestructible, earning them a reputation as “forever chemicals.” Used to make products stain-, grease-, and water-resistant, PFAS can get into water during manufacturing or when products degrade in landfills. Risks include high cholesterol, some cancers, and learning delays in children.

# ***SOLUTIONS***

Most contaminants contributing to poor water quality are the result of current-use compounds from industrial, agricultural, urban, transportation, and natural sources. In addition, there is growing concern about new classes of contaminants, such as pyrethroid pesticides, pharmaceuticals and personal care products.

Solving the water and sanitation crisis is today an urgent global priority with consequences far beyond water and sanitation, impacting inter alia economic development, food security, health, peace and security, and gender equality.

Sustainability

## ***INNOVATIVE TECHNOLOGY***

Our systems utilize the latest Innovative technology to remove impurities, contaminants, and harmful substances from water supply.

## ***CUSTOMIZABLE SOLUTIONS***

We believe that every client is unique, and their water requirements vary. Hence, our experts will work closely with you to tailor a water purification system that perfectly aligns with your preferences and budget.

## ***ECO-FRIENDLY INITIATIVES***

As environmental stewards, we are committed to sustainability. Our water purification systems are designed to reduce any kind of contamination without using chemicals, promoting a greener and cleaner planet.

# CLIENTS

## Residential Customers:

Homeowners

Residential Building

Individuals seeking clean water solutions for their households

Clients with private wells or boreholes looking for well water purification systems

## Commercial Clients:

Restaurants and eateries

Hotels and resorts

Office buildings

Retail stores

Gyms and spas

Any commercial establishment requiring clean and purified water for daily operations

## Industrial and Manufacturing Units:

Manufacturing plants

Industrial facilities

Factories requiring water purification for production processes and employee use

## Municipalities and Government Bodies:

Municipal water treatment facilities

Government buildings and facilities needing clean water solutions

## Educational Facilities

Schools

Universities

# ***WE OFFER***

## **Remove Perfluoroalkyl substances (PFAS):**

- **Residential Well systems**
- **Commercial-grade systems**
- **Industrial-scale systems**

## **Filtration and Purification Units:**

- **Carbon filters**
- **Multi-stage filtration systems for removing impurities and improving taste**

## **Whole House Water Treatment Systems:**

- **Comprehensive systems for treating water at the point of entry into a property**

# WHOLE-HOUSE WATER FILTERS

Transform Your Home with SKS Pure, Healthy Water

No matter if your water comes from a city supply or a private well, experience the difference of clean, high-quality water throughout your entire home—instantly and effortlessly.
